▼ GeniSYS™ IV Portable CNC Mill

For removal of cracked or broken studs, and refurbishment of damaged threads

- CNC software allows the GeniSYS IV to be programmed to perform multiple tasks within its working envelope
- Can create bore and thread hole diameters ranging from 0.875 – 11 inches (22,2 mm – 279,4 mm)
- Hole depths up to 15.12 inches (384 mm)
- High tolerance profile rails produce consistent results
- All three axes utilize precision ground ball screws, providing precise movement of the milling head
- Accurate and repeatable machining
- A cold cutting operation
- Ejects chips during operation
- Single machine capable of drilling, threading and general milling applications

▼ Thread cutting

1

Included as Standard

The machine is supplied complete with the following items:

- GeniSYS IV milling machine
- Control System
- Laptop
- Motor and cables
- · Storage / shipping boxes
- · Operator's manual

GeniSYS™ IV Portable 3-Axis CNC Milling Machine

GeniSYS™ IV Portable CNC Mill

The GeniSYS IV is a highly portable 3-axis CNC milling machine.

The motion control command

center provides the ultimate in performance monitoring and technician safety.

Designed for the accurate removal of cracked or broken studs up to 11-inch diameter and the precise refurbishment of damaged threads. This is achieved without the need for manually controlled drilling or metal disintegration techniques.

Can be used for automated general profile milling applications.

Typical examples

- Manway covers
- Reactor studs
- Bolt extraction and threading applications
- · Recirculation pumps
- Turbine cases
- Heat exchangers
- Motor bases and many more high impact assets

GeniSYS

Hole Diameter:

% - 11 inches

Hole Depths:

Up to 15.12 inches

▲ A typical thread before refurbishment

▲ New machined thread

Tooling

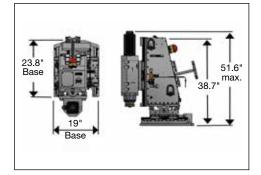

Standard tooling packages available to support general milling and thread milling applications.

▲ Enlarging a hole

▲ Coring out the center of a bolt (minor diameter).
